

Year 8

Volcanoes

Task

For your assessment your teacher would have already asked you to research for information on Mount St Helens for your homework.

Using the information you have gathered and the notes you have made from the video, produce a report on the eruption in the form of a newspaper.

You can complete your assessment on paper or by using a computer
Remember your teacher is not only looking for your knowledge and understanding, your use of ICT is important.

How your work will be graded.

Level	What to include
3	Map locating Mt.StHelens Brief out line of the eruption (what Happened)
4	Local and world maps locating Mount St.Helens. Show why volcanoes are found here. More detailed account of the eruption.
5	Show what happens at the boundaries to cause volcanoes. (Diagrams needed)
6	Show how people reacted to the eruption before and after e.g. Local people, Government officers and Scientists.
7	What where the immediate (Primary) effects and the longer term (secondary) effects of the eruption on the area.

Use this sheet as a tick off sheet to complete your work
